

ALUPROTEC 5451

Heat-resistant sheet to protect human body from melted metal spatter & radiati

ALUPROTEC 5451 Gauge

General Description:

Aluminium directly attached on to the flameproof rayon fiber

Base cloth: Flameproof rayon fiber 580g/m²

Thickness: Approx. 0.7mm

Adhesive: single sided reflective aluminium

Original Roll: Width 150cm x Length 50M

Weight: 580(±30)g/m²

Color: Silver(Aluminium) / Black(Rayon)

Tensile strength: Warp 130 Weft 90 DAN/ mm

Tear strength: Warp 6 Weft 6 DAN/mm

※1(daN)=10(N)=1.02(kgf)

ALUPROTEC 5451

Product Feature:

- High-level protection against melted metal spatters
- Flexibility and comfort
- Well humidity resistance
- Well heat reflection by evaporating aluminium
- Inconspicuous soil since the base cloth is black color

Usage:

- Emergency protective clothing
- Protective clothing at blast furnace sites
- Partitions and curtains as measures against radiation heat from high-temperature facilities
