

# Glass cloth heat resistant sheet

## Silicon-coated glass cloth heat-resistant sheet

### Usage

As spark-protection sheets,  
heat-resistant curing covers  
and heat-resistant partition  
sheet

Thickness 0.45mm Weight 520g/m<sup>2</sup>  
Width 960mm x Length 30M/roll  
Color Grey  
Heat resistant temperature  
Glassfiber cloth approx. 300°C  
Silicone resin approx. 200°C  
As spark-protection sheets, heat-resistant curing covers and heat-resistant partition sheets

This sheet is made of glass cloth of  
impregnated with highly heat-resistant  
silicon resin. It has waterproof and electrical  
insulating properties.
